

Solution Canvas

One page to turn a real government problem into a solution the mission can actually adopt.

Work it as a table, not alone. Fifteen to twenty minutes per quadrant.

CHALLENGE _____

TABLE _____

DATE _____

SOLUTION KEY IDEAS

What is the idea, in plain language? What problem does it solve, and for whom? What already exists that you can build on?

DEVELOPMENT AND ADOPTION STRATEGY

Who has to say yes? What is the pilot? How does this get from one office to many, and what stands in the way?

USER INTERACTIONS AND EXPERIENCE

Who touches this day to day? What changes for them? What training, onboarding, or handholding does it need to stick?

METRICS

How will you know it worked? Name numbers you can actually pull. What is the baseline today?
